

**INTERNATIONAL CONFERENCE ON  
APPLICATIONS OF SMART MATERIALS  
(ASM - 2020)**

**February 05 - 07, 2020**

**Organized by**

**DEPARTMENT OF CHEMISTRY  
DEPARTMENT OF PHYSICS  
DEPARTMENT OF BIOCHEMISTRY & BIOTECHNOLOGY  
DEPARTMENT OF PHARMACY  
ANNAMALAI UNIVERSITY**

**(Accredited with "A" Grade by NAAC)**

**Annamalainagar - 608 002**

**International Conference on  
Applications of Smart Materials (ASM-2020)**

OP 32:	M.Nushrath Roshana University of Jaffina Srilanka.	Efficiency of kukkilchoranam and thaharakottaithalam in karapponnoi(ECZEMA) in traditional medicine in srilanka
OP 33:	U. Sathya PRIST university	1,3-bis(2-cyanopropan-2-yl)-5-methylbenzene.
OP 34:	Murugan Kumaresan Kalasalingam Academy of Research and Education	Synthesis and characterization of natural clay loaded Sm <sub>2</sub> MoO <sub>6</sub> nanocomposite for improved photocatalytic and electrochemical performance
OP 35	M. Menaka Annamalai University.	Transdermal drug delivery system: A review
OP 36	Dr. M.A. Sokoto Usmanu Danfodiyo University, Sokoto, Nigeria	Application of neat kaolin as a catalyst for up-gradation of pearl millet husk pyrolysis oil
OP 37	K.K. Sivakumar AMET Deemed to be University, Chennai	Indigenous solar evaporator-condensate effluent treatment management.
OP 38:	K. Harini Chettinadu University	Niosomal Nanoformulation of Rhodamine Improves ROS Quantun yield and Inactivates MDR Bacteria.
OP 39:	Koyeli Girigoswami Chettinad Academy of Research and Education	The applications of engineered nanostructures in biomedical field.
OP 40:	T. Rathimala Annamalai University	Analyze the virtualization of an efficient interrupt coalescing and virtual receive side scaling performance computing through fast overlay network.
OP 41:	M. Fathimunnisa AVC College Mannampandal	Synthesis, characterization and molecular docking studies of some novel Schiff base derivatives.
OP 42:	C. Uma Annamalai University	In vitro anticancer activity of silver nanoparticles synthesized from <i>Rhizopus delemar</i> .
OP 43:	V. Sheeba Agnes Annamalai University	Gutman index of product graphs.
OP 44:	R. Padmavathi Meenakshi Sundararajan Engineering College, Chennai.	Spectroscopic and quantum chemical analysis on adapalene 0.1% and benzoyl peroxide 2.5% gel and its efficacy.
OP 45:	G. Sahaya Chettinad College of Engineering and Technology	Inorganic metal halide and lead-free perovskite nanomaterials for optoelectronic device applications
OP 46:	P. Agalya Arignar Anna Govt. Arts College, Namakkal	Amide VI band analysis of conformational changes in secondary structure of ovalbumin: effect of Ph and cosolvent sugar free.
OP 47:	T. Radhiga Annamalai University	Protective effect of galangin against-isoproterenol mediated oxidative stress and inflammation in the cardiac tissue.
OP 48:	R. Valliappan Annamalai University	Isolation, purification and identification of antioxidants from <i>Commiphora caudata</i> , Engl.; (Burseraceae).

**OP-32: Efficacy of kukkilchooranam and thaharakottaitailam in karappannoi (eczema) in traditional medicine in Srilanka****Nushrath Roshana. M<sup>1\*</sup>, Navaluxmy<sup>1</sup>, K. Kavitha<sup>2</sup>**<sup>1</sup>*Unit of Siddha Medicine, University of Jaffna, Kaithady, Srilanka.*<sup>2</sup>*Department of Physics, Annamalai University*

Background: Srilankan Traditional Medicine rich in diversity and combination of the Indigenous Medicine of the country DeshiyaChiktsa, Ayurveda, Siddha, and Unani Medicine. While the different system of Medicine all come together to form the body of knowledge that we today refer to as "Srilankan Traditional Medicine". Karappan (Eczema) is a disease condition in Traditional Medicine which skin and caused to inflame/ irritation. It is caused by excessive intake of Kiranthi foods like fish, mutton, prawn, cuttle fish, crab, low grade food materials like varagu, thinaii, rhizome, living in hot and cool weather, some poisonous bites, hereditary and contact of allergens like cosmetics, plants, hard soaps, detergents. In books Siddha Maruththuvam (specail), Agasthiyar 2000 and Pararasasegaram the following symptoms are mentioned for KarappanNoi. There are itching, redness, inflammation, vesicle, secondary infection, pustules, hyperpigmentation, hyper keratinization, and scaling skin. In wet type itching followed with vesicles, oozing, and then hyper pigmentation and only in later stage keratinization. KukkilChooranam and ThaharakottaiThailam are using to cure the KarappanNoi by the traditional Doctor Mrs. M.Pathmanathan, on her 3rd generation since 1937. Methods: Two hundred and seventy patients who had this symptom of KarappanNoi who attended E.M Siddha Ayurveda Clinics conducted in Ampara district, Kalmunai town, and Karaitivupiradeshasabah were selected for the study from 23.08.2017 to 25.11.2017 (3 months).The collected data were statistically recorded and analysis made. Results: According to the analysis the signs and symptoms in 64% of those used only this chooranam started gradually disappearing.It was seen reduce the sign and symptoms to 48% of those took only the ThaharakottaiThailam for external use. The sign and symptoms in 93% of those who took this chooranam for internal use and ThaharakottaiThailam for external use started gradually disappearing. The above all three groups observed under the diet restriction. But 5 of the group 2 and 3 patients could not continue with the treatment as the Thaharakottaitailam was increased this karappannoi.Conclusion: Therefore, KukkilChooranam and ThaharakottaiThailamare the best healer for karappannoi. These ingredients can be get anyone and there was a very small percentage of adverse effect observed by using of these medicines. Hence the karappannoi can be kept under control by using these medicines.
